

TRI LUX
SIMPLIFY YOUR LIGHT.

NOVATEC LEEK

Netherlands

Novatec Leek

A new building needs more than just four walls and a roof - especially for Novatec in Leek. The social development company of the municipality of Westerkwartier (province of Groningen) provides jobs for people with disabilities.

Peace and quiet, an overview and comfort are not luxury goods here, but just as necessary as having a roof over your head. Lighting plays a decisive role here. Together with its installation partner Koninklijke Damstra, Van Triest Lichtconcepten developed a plan with TRILUX luminaires that goes far beyond "sufficient light".
