Nextrema LED surface-mounted luminaires IP66

Ice cold or boiling hot, damp or dusty – no problem for the Nextrema LED with its robust die-cast aluminium body in cold stores, food production facilities, distribution centres or car parks at temperatures of -30°C to +35°C. In addition to its robust exterior, the luminaire's quality of light is also impressive throughout: the light is pleasantly homogeneous, glare-free and especially energy-efficient. Installation is also particularly simple and time-saving thanks to a number of clever functions.

Belviso C1 LED ceiling-recessed luminaire

The Belviso luminaire family represents high quality lighting solutions together with glare-free light and unusual lighting effects. The design of the Belviso Cassette as a pure surface is enlivened by the precisely delineated light contour. The colour-illuminated light frame is available optionally and achieves an emotional upgrading of the lighting design. Five expressive alternatives mean that room-specific or individual colour codings can be selected.

8841 LED bollard

The 8841 LED product range scores with a characteristically high-profile appearance and a diversity of luminaire versions. Various wide light distributions and different luminous flux packages provide maximum visual comfort and guarantee perfect illumination, enabling large spacing between the bollards.
