Products used

Solegra LED surface-mounted luminaire

Solegra LED floats below the ceiling like a large sun. With its uniform, glare-free light and modern, purist design this series of round luminaires lends any room a special look, and is ideal for e.g. creative zones, VDU workstations and prestigious sales spaces.

Bicult LED desktop luminaire

Bicult LED is the first desktop luminaire in the market to combine direct and indirect light output, thereby ensuring standard-compliant lighting. In addition to freedom of glare, flexibility and individual light settings are the main focus points.
