Products used

8841 LS

Constructional architecture does not stop with the outer facade but continues with the building surroundings. During daytime the new TRILUX LED bollard luminaire 8841 emphasises the design of the outdoor area, while during twilight and in the evening its excellent illumination guides the way. Whether with asymmetric or rotationally symmetric wide light distribution, the LED bollard luminaire guarantees optimal light effects with all luminaire versions. Additional protection from vandalism is provided by the possibility of a supporting column with continuous underground support.

8841 LED bollard

The 8841 LED product range scores with a characteristically high-profile appearance and a diversity of luminaire versions. Various wide light distributions and different luminous flux packages provide maximum visual comfort and guarantee perfect illumination, enabling large spacing between the bollards.
