Products used

E-Line NEXT LED modular continuous line

Still in the portfolio for the refurbishment and expansion of existing systems: the E-Line Fix continuous line system with trunking that has been tried and tested for many years. This ensures continuity and investment security for our customers and E-Line users - and is what the TRILUX after-sales promise stands for.

LiveLink Premium

Optimum, individually adapted light with minimum effort – now achieved thanks to the intuitive and reliable control of all light points. The simply installed, intelligent LiveLink light management system developed by TRILUX together with the sensor manufacturer STEINEL enables the highly simple planning and operation of even complex lighting system controls. The system features especially simple commissioning, deemed one of the major challenges with control systems – LiveLink intuitively guides planners and installers through pre-configured rooms with typical applications. Commissioning and operation is implemented using a graphical user interface on mobile iOS or Android end devices. With LiveLink, TRILUX offers simple and intelligent access to the world of light control.
